May: 2017

Hi everyone,

You will notice a new heading "**Collection Tubs updates**" in the top right hand corner. It has been suggested that we now keep a running total of just how much income these tubs actually bring – and we think it's a great idea, so here we go!

Remember we promised you some mega coverage of our Amazon Tidal Surge idea on live radio? Yes? Good! Here is the list of radio stations that will be airing our 'jingle'. Can you be bothered with a few extra clicks to get enrolled and raise money for nothing? I hope so..... 📻 **wrfn1025, wiganfm, Torbay Sound, Big Venture Radio, Radio CityFM 89.2MHz** (in Germany), **rcfm-digital.net, Vulcan Sound, Radio Monro UK, Revival Internet Radio, Soulbeat Radio, Soul Legends, Shoreways Radio, Hospital Radio 6 in Australia, Surf Radio, Coastal Radio, RLMA, Island FM** (in Gran Canaria). [Check them out & listen](#) in folks! 😊

And I've just had word from Peter: *Hi Phil. I have managed to get your ad taken on by another company that makes and distributes shows around the world, on about another 12 stations over and above what we already cover. It will be in shows that will be broadcast mid to late April. It will only be in for two weeks, but hopefully every little will help.*

That is 27 radio stations WORLD-WIDE that we will get coverage – brilliant, just brilliant

"20-20 Voice" Cancer

<http://www.2020cancerappeal.org/>

We are having some car stickers made up, as shown here. If you would be kind enough to stick them on your bumper, rear windows or side windows please email me at: admin@2020cancerappeal.org – **let's get the name out there folks!** (200mm x 55mm)

And so to what turned out to be fantastic night at the **Cuisine of India** on Monday 3rd April. Our first "**Spring Meal**" venture and all I've had in feedback has been good news from our 56 attendees and my sincerest thanks go to every one of them, especially our specialist 'lary' nursing team who supported the evening. Our patron, Mr Willie Thorne, excelled as our host and kept everyone entertained & up to date with news etc. Sadly "AK" failed to provide a microphone so that was me rendered useless - raffle ticket ripper-upperer for my sins 😊. We managed to part with a good few car stickers (internal & external) which will certainly get our name out & about and we also introduced **40** tubes of **Smarties**, donated by **Waitrose, Oadby** (thank you so much Shree & Manisha). I doubt that all 40 will be returned

full of 20p pieces but I suppose we can cope with 39! 🤗 The **20-20** “Hall of Fame” awaits all you **Smarter Smarties Savers!** On the night we raised a superb **£571.00**, banked the next morning, which will go towards the next purchase we have in mind. 🤗

Fairfield Public House (tubs) weighed in with a superb £43.13p... Saffron Lane WMC weighed in with £25.28p... Mill-on-the-Soar raised £11.49p... The Olde Royal Oak £1.59... Chill-out Ca £3.72... The Unicorn £5.33... The White Horse £5.71... The Fox Inn £8.59...

The “20-20” Hall of Fame awaits!

Having enjoyed a great meal at the **Cuisine of India**, I wonder how many of you are now quietly filling up your **Smartie** tubes with 20p coins ??? 🤗

And now for the BOMBSHELL we promised you goodly folks!

When a plan comes together...

“After nearly 20 years of experience within cancer nursing I decided that it was time for a change. Wanting to utilise my skills and experience I started to search the job market in August 2016. I saw a secondment opportunity with NHS England (East Midlands Cancer Network to be precise)! The job is funded by Macmillan and the purpose was to scope the Head and Neck Services within East Midlands. So fast forward 9 months and here I am (a whole 3 months into my role). The purpose of this project is to baseline what services East Midlands currently provide, speaking with healthcare professionals, commissioners and of course and arguably the most important people YOU, or your loved one, who is or has gone through the head and neck cancer “journey”. Only by talking and listening to you and those who care for you will we understand how this awful cancer and /or treatment has affected your lives on a day to day basis. By understanding the challenges and your experiences we can then look to how we can shape and improve the service. We are leaving no stone unturned and looking at the beginning of the journey (i.e. prevention/screening through to diagnoses) then onto treatment and of course living with and beyond cancer. I have teamed up with **“20-20 Voice” Cancer** as I absolutely believe earlier diagnosis will save lives and that there is a need to support patients throughout their journey”. Best wishes... CP [**you cannot believe how excited I was to receive this confirmation!**]

Welcome to **“20-20 Voice” Cancer** to **Caroline Penn** who is attempting to bring Head & Neck cancers, (diagnosis, treatment, pre-op & post-op care) to the fore. Caroline did some digging, found us, liked what she saw, approached us & bingo folks, here we are. The idea is for ‘trained’ GP’s to use the FVR at the earliest stages of concern and then to report immediately to ENT Consultants if concerns arise & further investigation is needed. This, I have always firmly believed, is what has been needed for years in this field of cancer. Spending £millions on research is nothing compared to early diagnosis that we are almost in the driving seat to provide. We have one area that has already agreed to a trial run and funding is in place for this project. **We** simply now need to find the funds for the equipment

Further BIG news event coming in a couple of days folks!

Phil J
